-----  
Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

Why should Tunisia invest in Tereg?

" By fostering renewable energy development, TEREg will strengthen Tunisia's position in clean energy, creating economic opportunities and ensuring long-term energy security," said Alexandre Arobbio, World Bank Country Manager for Tunisia. " This project reflects our strong partnership with Tunisia and supports its sustainable development goals.

What is a virtuous cycle of energy production in Tunisia?

A virtuous cycle of green, affordable, and financially viable energy production. I. The Tunisian Energy Landscape Tunisia relies on imported natural gas to meet the majority of its growing electricity needs, even though the country has a vast potential to generate renewable energy.

Can Tunisia export green electricity?

Exploiting its renewable energy potential will also allow Tunisia to export green electricity, including green hydrogen, contributing to the GHG emission targets of the Maghreb and Europe.

What are Tunisia's energy projects? One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which ...

The TEREg program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind ...

Renewable energy is then expected to cover 50% of the electricity needs by 2035, and 100% of all electricity needs by 2050. This ...
