Where is the first hydrogen refueling station in Indonesia?

PT PLN (Persero) inaugurated the first Hydrogen Refueling Station (HRS) or hydrogen vehicle filling station in Indonesia located in Senayan, Jakarta on Wednesday (21/2).

Is hydrogen a low-carbon energy source in Indonesia?

Hydrogen has great potential to store and transport energy in various sectors, including energy storage, transportation, industrial processes, and power generation. By integrating hydrogen as a low-carbon technology, Indonesia can significantly reduce emissions and accelerate the transition to clean energy to achieve global climate targets.

What role does hydrogen play in Indonesia's energy transition?

"Hydrogen plays a strategic role in the energy transition. Especially in the transportation sector, hydrogen-based vehicles have no emissions. Hydrogen development is proof of Indonesia's commitment to expanding access to accessible and clean technology," said Jisman.

Does Senayan HRS have a hydrogen charging station?

The Senayan HRS is equipped with hydrogen-based electric vehicle chargers, functioning similarly to public electric vehicle charging stations. Furthermore, a Hydrogen Center and Hydrogen Gallery Room have been established as training and educational centers for hydrogen-related activities in Indonesia.

In Indonesia, hydrogen fueling stations are emerging as a critical component of the clean energy transition, particularly in transportation decarbonization. They support passenger ...
