-----  
Do I need a specific lithium battery Shipping Class?

FedEx Ground strongly recommends that anyone shipping lithium batteries take a specific lithium battery shipping class in order to better understand these complex regulations and meet DOT/ICAO/IATA/IMDG/USPS requirements.

Are lithium ion batteries regulated?

Shipping of lithium ion cells >60 WH and batteries >300 WH and lithium metal cells >5 grams lithium per cell and >25 grams per battery as fully regulated Class 9 hazardous materials. This includes Class 9 batteries that are "packed with" and "contained in" equipment. There is no general relief for larger batteries.

How do I ship a lithium battery?

Note: Use durable, weatherproof labels, and ensure they are placed on the outer packaging (not on shrink wrap or removable covers). In addition, a Shipper's Dangerous Goods Declaration (DGD) is generally required when shipping fully regulated lithium batteries, such as those not meeting exemption criteria.

Can a lithium battery be shipped if recalled?

Note: Damaged or recalled lithium batteries are prohibited for air transport. For ocean, acceptance is determined on a case-by-case basis. Shippers should contact their carrier or freight forwarder to confirm if special approvals and packaging can be arranged under IMDG Code provisions. How are lithium batteries classified for shipping?

Extensive measures have been taken to safely transport what is an exponentially increasing volume of lithium-ion batteries, in their various states of charge and when also ...

Welcome to our technical resource page for How can lithium-ion batteries in solar container communication stations achieve Internet access ! Here, we provide comprehensive ...

The working principle of emergency lithium-ion energy storage vehicles or megawatt-level fixed energy storage power stations is to directly convert high-power lithium-ion battery packs a?| ...

What is a shipper's declaration for lithium ion batteries? By signing the Shipper's Declaration, the shipper is making a legal statement that all the applicable provisions of the DGR have been ...

This guide zeroes in on lithium-ion and lithium-metal batteries, the two chemistries that face the tightest controls. The rules are especially ...

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather-resistant shell. Our systems can be deployed ...

Since let's get real: solar panels can get all the fame, but the battery system is what keeps the lights on when the sun doesn't. The ...

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather ...

It integrates high-efficiency solar panels and durable lithium batteries to ensure continuous and stable operation of small telecom devices such as mini cellular towers, signal repeaters, ...

This guide zeroes in on lithium-ion and lithium-metal batteries, the two chemistries that face the tightest controls. The rules are especially strict for air transport due to the ...

These lithium batteries may be poorly designed, have little protection, and/or contain manufacturing flaws. It is important to verify the batteries planned for shipment have been ...

Since let's get real: solar panels can get all the fame, but the battery system is what keeps the lights on when the sun doesn't. The wrong battery can mean shorter lifetimes, ...
