Is Trina Solar a good solar company?

Where Trina Solar falls short is in the quality of its solar panels. The company's residential solar panels have a degradation rate ranging from 0.4% to 0.6%, with a decrease of 1% to 2.5% in the first year. This means that its panels perform more poorly than some of the solar panel companies that rose to the top of our list.

What are the best solar panels?

With so many solar panel manufacturers on the market, we had a few companies that almost made it to our top five best solar panels list, including: Silfab Solar: This company offers solar panels that perform well in low-light conditions, making it a close runner-up for homes in climates that receive less sunlight than average.

Does Trina Solar offer hail resistant solar panels?

Trina Solar offers an impressive seven options for residential solar panel installations, including a panel specifically designed for hail resistance. These options give homeowners the ability to truly customize their solar panel system to their specific needs. The company also prides itself on selling affordable solar panels.

Are monocrystalline solar panels better than thin-film solar panels?

Overall, monocrystalline solar panels perform better than thin-film solar panels. Some solar panel brands have developed panels that are heat-, weight-, snow- and wind-resistant, meaning they won't deteriorate as quickly under the same circumstances as panels that lack these features.

We've rounded up the top five best solar panels, so stay tuned to compare your options and choose the top solar company for your system. The Forbes Home team is committed to ...
